SUMMARY

BINUS University (GPA 3.83) Computer Science student and specialized in Software Engineering, Full Stack Development and Scalable System Design. Proven experience in developing web and backend systems with a focus on clean code, design patterns and software architecture. Currently expanding into AI engineering and exploring RAG systems, multi-agent architectures, and LLM evaluation. Curious, passionate to learn, build and create software to solve real-world problems.

EDUCATION

BINUS University
Bachelor of Computer Science, Software Engineering
Relevant Coursework: DSA, Object-Oriented Programming, System Design, Software Engineering, Operating Systems, Ai Engineering

Sep 2024 - Present
GPA - 3.83/4.00

EXPERIENCE

Freelance Web Developer
• AdelliaFlorist.vercel.app — Independent Client, 2026 | Designed and developed a responsive website for a local flower shop, providing the business with its first dedicated online presence.

2026 - Present

Web Development Activist • HIMTI BINUS University
• Coordinator — PBP (Pembelajaran Bahasa Pemrograman) TECHNO 2025 : Coordinated committee activities and event execution,Managed communication between divisions,Contributed to programming education initiatives for new students.
• Logistics & Operations Committee HILET 2025 : Managed event logistics and operational requirements, coordinated equipment and venue preparation, and supported on-site event execution.
• Event Committee SESVENT 2025 : upported event planning and execution, coordinated event activities with committee members, and ensured operational needs were handled throughout the event.
• Contributed to the development and maintenance of the HIMTI website by implementing web features, resolving issues, and collaborating with the development team.

Mar 2024 - Present

EEO Activist • BNCC BINUS University
• Coordinator - IIT X TFISC Scratch Competition 2026 : Coordinated competition preparation and execution, managed communication between committee divisions, monitored task progress, and ensured event activities ran according to schedule.
• Event Committee BNCC TechUp 2026 : Supported the planning and execution of BNCC TechUp, assisted with event operations, coordinated with committee members, and helped ensure a smooth participant experience.

Mar 2025 - Present

SKILLS

C, Java, Python, TypeScript, JavaScript, Dart, NestJS, React, Flutter, Scikit-learn, MySQL, Prisma, Supabase, PostgreSQL, Git, Docker, Orca, Agent Orchestration, Leadership, Problem Solving, Team Management, Adaptability

ACHIEVEMENT

Technoscape 9.0 Hackathon Finalist
• Developed a cooperative management application focused on optimizing procurement workflows and strengthening organizational governance.
• Designed and implemented Collective Buying and Audit Logging modules to support collaborative purchasing and transaction traceability.
• Utilized React Native for mobile development and NestJS for backend architecture, API development, and business logic implementation.

Jul 2025 - Oct 2025

PROJECTS

Electus ATS

NestJS, Ollama, PostgreSQL, RAG, Vector Embedding

- Built an AI-powered ATS using semantic search and local LLMs for candidate screening.
- Designed a microservice architecture and implemented hybrid retrieval using embeddings and full-text search.

VolumeMate (TechnoScape 9.0 Finalist)

React Native, NestJS, FastAPI, PostgreSQL

- Developed a cooperative procurement platform with collective buying and demand forecasting.
- Implemented audit logging and supplier recommendation features to improve transparency and cost efficiency.

Olan.Dev Portfolio

Three.js, React, JavaScript

- Created an interactive 3D portfolio experience with game-inspired navigation.
- Designed custom scene interactions and responsive web animations.
