CAREER SUMMARY

Computer Science student at BINUS University (GPA 3.77) with a strong interest in Software Engineering. Skilled in software architecture, design patterns, clean code practices, Mobile development and scalable application development. Experienced in building web and backend systems, with a project recognized as a technology competition finalist. Passionate about continuous learning and creating impactful software solutions.

ORGANIZATION EXPERIENCE

Coordinator — PBP (Pembelajaran Bahasa Pemrograman)

HIMTI, BINUS University, Jakarta

- Coordinated committee activities and event execution.
- Managed communication between divisions.
- Contributed to programming education initiatives for new students.

Activist of Web Development

HIMTI, BINUS University, Jakarta

- Contributed to the development of web applications by implementing frontend and backend features while collaborating within a team-based development environment.
- Enhanced technical expertise through hands-on projects, code reviews, and knowledge-sharing sessions focused on software engineering best practices and web technologies.

EDUCATION

BINUS University

Bachelor of Computer Science, Software Engineering

2024 – Present

- **Current GPA:** 3.77/4.00
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Human Computer Interaction, Software Engineering, Operating Systems

SKILLS

Technical Skills

- **Programming Languages :** C, Java, Python, TypeScript, JavaScript, Dart.
- **Framework & Library :** NestJS, React, Flutter, Scikit-learn.
- **Databases :** MySQL, MongoDB, Prisma, Supabase, PostgreSQL.

- **Tools** : Git, Github, Docker, Aseprite.

Soft Skills

- **Leadership**: led teams and coordinated event execution as a PBP Coordinator, ensuring effective collaboration and successful project delivery.
- **Problem Solving** : Applied analytical thinking to develop technology-driven solutions for real-world challenges, including a finalist hackathon project focused on cooperative digitalization.
- **Team Management** : Collaborated effectively with diverse teams in both technical and organizational settings to deliver projects and events efficiently.

ACHIEVEMENT

Technoscape 9.0 Hackathon Finalist

Developed a cooperative management application focused on optimizing procurement workflows and strengthening organizational governance.

- Designed and implemented Collective Buying and Audit Logging modules to support collaborative purchasing and transaction traceability.
- Utilized React Native for mobile development and NestJS for backend architecture, API development, and business logic implementation.

PROJECT

Electus ATS

NestJS, Ollama, PostgreSQL, RAG, Vector Embedding

- Built an AI-powered ATS using semantic search and local LLMs for candidate screening.
- Designed a microservice architecture and implemented hybrid retrieval using embeddings and full-text search.

VolumeMate (TechnoScape 9.0 Finalist)

React Native, NestJS, FastAPI, PostgreSQL

- Developed a cooperative procurement platform with collective buying and demand forecasting.
- Implemented audit logging and supplier recommendation features to improve transparency and cost efficiency.

Olan.Dev Portfolio

Three.js, React, JavaScript

- Created an interactive 3D portfolio experience with game-inspired navigation.
- Designed custom scene interactions and responsive web animations.

and much more on my portfolio!
